

AKASH MALVI

Nagpur, Maharashtra | malviakash7666@gmail.com | linkedin.com/in/akash-malvi50313b281 | github.com/malviakash7666

PROFESSIONAL SUMMARY

Frontend Developer with a BCA (2024) and hands-on experience building scalable web applications using React.js, Next.js, TypeScript, Redux, and Tailwind CSS. Proven ability to implement complex features including email automation pipelines, real-time dashboards, ticketing systems, notification workflows, and AI-integrated tools. Skilled in REST API integration, Figma-to-code conversion, and backend system optimisation for high-volume processing.

PROFESSIONAL EXPERIENCE

Software Developer Intern — Shiksha Saarathi (shikhasaarathi.com)

5 June 2026 – Present | Nagpur, Maharashtra

- Developed campaign module for bulk email automation with queue-based processing for high-volume delivery.
- Implemented email tracking system to monitor open rates and delivery status for campaign insights.
- Built custom email template builder enabling users to create and reuse dynamic templates.
- Integrated multi-email provider system with domain-based sending selection for improved deliverability.
- Designed ticketing system with automated assignment based on category and employee workflow.
- Created HR dashboard with analytics visualising key operational and user-activity metrics.
- Implemented attendance notification system with scheduled PDF report generation and email distribution.
- Optimised backend logic for scalable email and notification handling, improving throughput and reliability.

PROJECTS

HireHub — PERN Stack Job Portal

Live: job-hire-hub.netlify.app | GitHub: github.com/malviakash7666/Hire_Hub

- Built role-based job portal UI with React.js, Redux, and Tailwind CSS; converted Figma designs into reusable components.
- Integrated REST APIs with separate employer/candidate dashboards, form validation, and state management.

Resume AI Coach — AI-Powered Resume Optimisation Tool

Live: resume-ai-coach.netlify.app | GitHub: github.com/malviakash7666/ResumeAI.Coach

- Built a full-stack AI resume coaching platform using Node.js, TypeScript, PostgreSQL, and Tailwind CSS to analyse resumes and generate actionable improvement suggestions.
- Integrated the Grok API to power AI-driven resume analysis, keyword matching, and personalised feedback generation.
- Designed a PostgreSQL schema to store user resumes, analysis history, and scoring data for fast retrieval.
- Built a responsive, ATS-focused UI with Tailwind CSS to present resume scores and improvement recommendations clearly.

E-Card — MERN Stack E-Commerce Platform

Live: e-card-home.netlify.app | GitHub: github.com/malviakash7666/E-Card

- Built a full-featured e-commerce platform using the MERN stack (MongoDB, Express.js, React.js, Node.js) with product listings, cart management, and order flow.
- Designed RESTful APIs for product catalogue, cart operations, and order processing with secure backend logic.
- Implemented dynamic product filtering, responsive UI, and state management for a smooth shopping experience.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Redux, Tailwind CSS, Bootstrap

Backend / DB: Node.js, PostgreSQL, MongoDB, REST API Integration, Email Automation, Queue-Based Processing

AI / APIs: Grok API Integration, AI-Assisted Application Development

Tools: Git, GitHub, VS Code, Postman

Concepts: Component-Based Architecture, State Management, Responsive Design, Debugging, System Optimisation

EDUCATION

Bachelor of Computer Applications (BCA) — Kamla Nehru College, Nagpur | 2024

PROFESSIONAL STRENGTHS

Problem Solving • Debugging • Team Collaboration • Communication • Time Management • Attention to Detail
